Sample Description:			
Sample No.	Sample Name <i>(so you know where sample was taken from)</i>	County <i>(where your sample was taken) If more than one county – use separate sheet for each county</i>	What are you going to grow in this area? <i>(See Landscape Category below – Only one per sample)*</i>
1			
2			
3			
4			
5			

Landscape Category: <i>(Choose Only ONE category per sample)</i>			
Landscape Category	Landscape Category	Landscape Category	Landscape Category
Lawn • Established L1 • New from seed L2 • New from sod L3	Mixed Beds • Annual & perennial flowers M1 • Annual flowers & roses M2 • Annual & perennial flowers & shrubs M4 • Perennial flowers & shrubs M3	Fruits • Apple F6 • Apricot F9 • Blueberry F2 • Bush fruit (current, gooseberry, elderberry) F5 • Cherry F8 • Grape F3 • Peach F9 • Pear F7 • Plum F9 • Raspberry (red, black purple) F4 • Strawberry F1	Shrubs • Azalea S3 • Bush fruit (viburnum, juneberry) S1 • Deciduous S5 • Evergreen S4 • Rhododendron S3
Vegetable Gardens • Mixed vegetables G1 • Asparagus G2	Annual Cover Crops (Green Manure) • Alfalfa AC2 • Barley AC1 • Buckwheat AC1 • Clover AC3 • Oat AC1 • Rye AC1 • Wheat AC1		Trees • Evergreen T3 • Hardwood flowering T2 • Hardwood shade T1
Flower Gardens • Annual FG1 • Perennial FG2 • Prairie FG3			Topsoil – choose a landscape category that best describes the crop to be grown. <i>(See back for sampling details.)</i>
Permanent Cover Crops • Native/Bluegrass PC2 • Prairie PC1 • Trefoil PC4 • Vetch PC3			

*If no Landscape Category is given, we will assume L1.

Prices listed are per sample bag.

Routine test includes: pH, lime requirement, organic matter, phosphorous (P), and potassium (K) (\$15)

Additional tests: Calcium and Magnesium (\$3), Soluble salts (\$7), Texture: Percent Sand, Silt, Clay (\$23),
Lead screening: *Must fill out separate lead screening submission form (\$15)*

Sample size required for analysis: 1-2 cups.

Instructions for Submitting Samples:

Customer Information – Print your **name and address** in the space provided. **Check** the appropriate box as to how you wish to receive your results. Your results can be emailed or mailed through U.S. mail. Note that receiving the results by email is the quickest form in which you will receive your results. Please fill in your email if this is how you would prefer to receive your results. Leave blank if you only want the results mailed.

Payment Information – Enter your **account number** or the **amount** paid. The cost is **\$15.00 per sample**.

Indicate the **method** of payment (cash, check, or credit card) you are making. **Please make checks payable to: UW Soil Testing Lab**. Include a day-time phone number so we can call you for credit card information.

Your sample will be analyzed for pH, organic matter, available phosphorous (P) and available potassium (K). Based on the results of your test and what you told us you wish to grow in the sample area, we will tell you if you need to add nitrogen (N), phosphorous (P) or potassium (K) to achieve your goal of growing these plants. We will provide you with the pH of your soil and advise you on whether or not you should lime your soil. We will also provide you with the percent of organic matter which is currently in your soil.

Some common additional tests are as follows: lead, soluble salts, or physical analysis. Other tests include the secondary nutrients: calcium, magnesium, or sulfur, or the micronutrients boron, manganese, and zinc.

Required Sample Size: 1-2 cups

Sample Description – **Name** your sample. In other words, describe your sample or the area in which the sample was taken so you are able to identify which sample corresponds to which results. (This is particularly important if several samples are submitted at the same time). Indicate the **county** in Wisconsin where the sample was taken from (this is important for us to provide recommendations). Choose the appropriate **Landscape Category** from the list which BEST describes the plants to be grown (for example, M4 for a mixed bed of annual and perennial flowers and shrubs). Only **one** landscape category per sample, please. We recommend that you provide us with different samples per landscape category.

Topsoil Samples – If sampling from a pile of topsoil, recommendations will be given assuming the entire area will be spread with at least 6 inches of new topsoil. If the entire top 6 inches will not be replaced and the new topsoil will be spread over the existing soil, take the sample after spreading.

Submitting Samples – Send your sample by U.S. mail, UPS or other delivery system OR drop your sample off at the address below. Please be sure to include this sheet.

Soil & Forage Analysis Lab
2611 Yellowstone Dr.
Marshfield WI 54449

Phone: (715) 387-2523
Hours: 7:45 to 4:30 Monday – Friday

Results may take 3-7 days from the time we receive your sample for you to receive your results, but this may vary depending on the time of year. If you do not receive your results after 2 weeks, please call. Thank you!
